

Like Star Wars

Music: WinterBeach

Text: Mal McNaughton

Slow down and stop to think
Slow down and make the link
With all the dreamers of this world

Wake up and see the signs
Wake up and hold the line
With all the dreamers in this world

We hide it, like many do
We keep it, so far from view
True secrets, you wanted more

Try hard to keep apace
Try hard to take your place
With all the dreamers of this world

Speak loud and clear your mind
Speak loud and stay in time
With all the dreamers in this world

We hide it, like many do
We keep it, so far from view
True secrets, you wanted more

We need it, you need them too
We play it, it's nothing new
Like Star Wars, you wanted more

We hide it, like many do
We keep it, so far from view
True secrets, you wanted more

We need it, you need them too
We play it, it's nothing new
Like Star Wars, you wanted more

Like Star Wars you need them too
Cause you wanted more, it's nothing new
Like Star Wars you need them too
Cause you wanted more, it's nothing new
